

Integrations Guide

Supported integrations

- Gmail: OAuth connect, send + list email via Gmail API, auto token refresh.
- Google Calendar: OAuth connect, create + list events on the primary calendar.
- Outlook (Microsoft Graph): OAuth connect, send email, list messages, attachments.
- Microsoft 365 (Microsoft Graph): OAuth connect, mail, calendar events, To-Do tasks.
- Slack: Web API chat.postMessage with workspace token.
- WhatsApp Business (Meta Cloud API): send text, media download, webhook.
- Stripe: invoice payment links, Checkout Sessions, QR codes, webhook.
- OpenAI Whisper: meeting audio transcription.
- OCR (Tesseract): scanned document text extraction.
- Accounting: API-key client pushing invoices and expenses.
- Storage: Supabase-backed per-org file storage with quotas.

Configuration

OAuth providers need CLIENT_ID/CLIENT_SECRET/REDIRECT_URI settings in .env

WhatsApp needs WHATSAPP_API_TOKEN and WHATSAPP_PHONE_ID.

Stripe needs STRIPE_SECRET_KEY.

All integration tokens are stored encrypted in the integrations table.

Connect flow

Settings page -> Connect -> GET /api/v1/integrations/oauth/connect/{provider} returns an authorize URL -> OAuth callback exchanges the code, encrypts and stores tokens.
